

protein kinase c wikipedia - protein kinase c commonly abbreviated to *pkc* ec 2.7.11.13 is a family of protein kinase enzymes that are involved in controlling the function of other proteins through the phosphorylation of hydroxyl groups of serine and threonine amino acid residues on these proteins or a member of this family *pkc* enzymes in turn are activated by signals such as increases in the concentration of, **amp activated protein kinase the current landscape for** - since the discovery of *amp* activated protein kinase *ampk* as a central regulator of energy homeostasis many exciting insights into its structure regulation and physiological roles have been, **tyrosine kinase role and significance in cancer** - abstract tyrosine kinases are important mediators of the signaling cascade determining key roles in diverse biological processes like growth differentiation metabolism and apoptosis in response to external and internal stimuli, **cisplatin in cancer therapy molecular mechanisms of** - cisplatin cisplatinum or *cis* diamminedichloroplatinum ii is a well known chemotherapeutic drug it has been used for treatment of numerous human cancers including bladder head and neck lung ovarian and testicular cancers, **isg15 in cancer beyond ubiquitin like protein sciencedirect** - like ubiquitin conjugation ubiquitination isgylation of target proteins involves three step cascade of enzymes the initial step of isgylation is the activation of *isg15* using *atp* through the formation of a thioester bond between e1 activating enzyme *ube1* *uba7* and the c terminal glycine residue of *isg15* 24 25 *ube1* is a 112 kda protein that shows a 45 identity in amino acid sequence, **oncogenic trim31 confers gemcitabine resistance in** - how to cite this article *yu c chen s guo y sun c oncogenic trim31 confers gemcitabine resistance in pancreatic cancer via activating the nf b signaling pathway*, **personalized genotype directed therapy for advanced non** - introduction treatment for patients with metastatic non small cell lung cancer *nsclc* has historically consisted of systemic cytotoxic chemotherapy chemotherapy has a general goal of killing cells that are growing or dividing chemotherapy reduces symptoms improves quality of life and prolongs survival in some patients with *nsclc*, **cancer death causes prevention ben best** - causes molecular mechanisms prevention and treatment of cancer the tumor suppressor protein *p53* is a transcription factor that has been called the guardian of the genome when dna damage has occurred *p53* induces the *p21* protein to bind with and inactivate *cdk2* thereby preventing transition from g 1 phase to s phase until dna repair occurs or causing apoptosis by enhanced if effective, **lung cancer targets and therapy dove medical press** - an international peer reviewed open access journal focusing on lung cancer research identification of therapeutic targets and the optimal use of preventative and integrated treatment interventions to achieve improved outcomes enhanced survival and quality of life for the cancer patient specific topics covered in the journal include epidemiology detection and screening cellular, **parp inhibitors for brca1 2 mutated and sporadic ovarian** - current efforts to treat *brca* associated ovarian cancer *oc* with poly adp ribose polymerase *parp* inhibitors result from 25 years of basic and translational cancer research recently *olaparib*, **jci emerging evidence for targeting mitochondrial** - 1 department of radiation oncology robert h lurie comprehensive cancer center feinberg school of medicine northwestern university chicago illinois usa 2 free radical and radiation biology program department of radiation oncology holden comprehensive cancer center university of iowa iowa city iowa usa address correspondence to david gius department of radiation oncology, **nci drug dictionary national cancer institute** - the nci drug dictionary contains technical definitions and synonyms for drugs agents used to treat patients with cancer or conditions related to cancer each drug entry includes links to check for clinical trials listed in nci s list of cancer clinical trials, **categories of articles clinical cancer research** - targeted therapy immunotherapy clinical cancer research is interested in reports of clinical trials that involve both early and late stages of drug development clinical trial manuscripts should include a clear statement of the primary objective of the study patient eligibility criteria the measured endpoints and the statistical approach and analysis particularly for any biomarker, **chemoresistance transmission via exosome mediated epha2** - how to cite this article *fan j wei q koay ej liu y ning b bernard pw zhang n han h katz mh zhao z hu y chemoresistance transmission via exosome mediated epha2 transfer in pancreatic cancer*
